💼 **Objective:**

Software Engineer

✅ **Job Experience**

Volunteer @Fortress Of God (Day Care)
AUGUST 2023 - FEBRUARY 2024
As a volunteer at Fotress of God (Day Care), I provided support and assistance to the staff in ensuring the well-being and safety of the children. I engaged in various activities and tasks, such as supervising playtime, assisting with meal preparation, and helping with educational activities. Through this experience, I developed strong teamwork skills and a deep appreciation for the importance of early childhood education.

Software Engineer @Onah Africa
FEBRUARY 2023 - NOVEMBER 2023
As a Senior Software Engineer at Onah Africa, I contributed to the development and maintenance of software solutions. I utilized my skills in JavaScript, React.js, NodeJS, SQL, NextJS, NoSQL, and TailwindCSS to create efficient and user-friendly applications. Collaborated with cross-functional teams to gather requirements and design and implement software solutions. Worked on the front-end and back-end development of applications, utilizing React.js and NodeJS. Implemented and maintained databases using SQL and NoSQL technologies. Optimized code and improved performance, ensuring smooth and efficient application operation. Contributed to the development of blockchain-based applications, leveraging my knowledge of blockchain technology.

Data Entry Personnel (Intern) @GeekTech Limited

FEBRUARY 2019 - MARCH 2020

As a Data Entry Personnel at Geektech Limited, I was responsible for accurately entering and updating data in the organization's databases. Efficiently and accurately entered data into the database system, ensuring data integrity and completeness. Performed regular data quality checks to identify and resolve any discrepancies or errors. Assisted in the development and implementation of data entry processes and procedures to improve efficiency and accuracy. Collaborated with cross-functional teams to ensure data consistency and accuracy across different systems and platforms.

Cybersecurity Consult @Cyblack

OCTOBER 2023 -

Currently working as a Cybersecurity Analyst at Cyblack, where I am responsible for identifying and mitigating security risks to protect the organization's digital assets. My role involves: Devised and executed a custom PowerShell script to extract metadata from Windows Event Viewer, integrating with a third-party API for geolocation data analysis. Configured and managed a Log Analytics Workspace in Azure, focusing on the ingestion of custom logs for geographic data processing (latitude, longitude, state/province, country). Implemented custom fields in Log Analytics Workspace, aligning with Azure Sentinel for effective geo data mapping. Developed an Azure Sentinel workbook, visualizing global attack data (RDP brute force) with emphasison physical location and attack magnitude. Innovated a proof-of-concept File Integrity Monitor (FIM), establishing an integrity baseline for target files/folders using SHA-512 hashing. Conducted ongoing comparisons between actual files and baseline, initiating alerts for any deviations to detect potential compromises. Developed and managed a Vulnerability Management Lab, overseeing the installation and configuration of Nessus Essentials for credentialed vulnerability scans against Windows 10 hosts. Performed vulnerability assessments using Nessus, successfully identifying and remediating security vulnerabilities.
